

Wermuth Europe Income Strategy (WEIS)

June 2019

Investment philosophy

The strategy is one of value investing, with a focus on yield-generating assets in West European listed assets, as well as cash. Since this is a buy-and-hold approach without the use of leverage, there won't be any forced sales in a crisis. In order to keep transaction costs to a minimum, holding periods are several years. Even so, weekly liquidity is a key feature of the strategy - the portfolio consists almost exclusively of liquid large-cap stocks.

From November 2011, when the strategy was launched, through June 2019, the average annual return has been 14.7%, compared to 8.4% for the EuroStoxx 50 Net Return Index which is used as a benchmark.

No investments have been made, or will be made, into companies engaged in the exploration and production of fossil fuels, or stocks of firms which depend on burning them, in particular into any of the "Carbon 200 companies", as defined by Carbon Tracker. The strategy contributes to the reduction of capital available to the fossil fuel sector and thus has an indirect positive impact on the environment. Supporters of a divest-invest strategy will appreciate this approach (see www.divestinvest.org). Whenever possible, preference is given to firms which are strong in resource efficiency, renewables and low CO2 emissions, provided they are sufficiently liquid and at the same time paying attractive dividends.

Dr. Dieter Wermuth, partner and economist at Wermuth Asset Management GmbH, has previously been a staff member of the German Council of Economic Advisers, member of the asset allocation committee of Citibank AG, CEO of Manufacturers Hanover Investment Bank GmbH and Caisse des dépôts et consignations Investment Bank GmbH, adviser to the State of Hesse during the set-up of the stock exchange surveillance function in Frankfurt, head of fixed income research at WestLB in Düsseldorf and Chief European Economist at Tokai Bank/UFJ Group in Frankfurt and London.

NOTE: This document does not constitute an offer to invest or a solicitation of an offer to invest in this strategy in any jurisdiction in which an offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation and is for information purposes only. The value of the investment may go down as well as up and investors may get back less cash than originally invested. Past performance is not necessarily a guide to future performance. An investment in the strategy in whatever form is not the same as a deposit with a banking institution. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
